The District Safety Specialist is housed in the district being served and provides individualized safety/risk management service on a daily basis. The District Safety Specialist consults with and advises district administrators and staff concerning federal, state and local regulations and provides district on-site assistance in developing, implementing and coordinating district-specific health, safety and environment programs.

The District Safety Specialist provides individualized service to a school district by assisting in the development and implementation of district specific health, safety and environmental programs through the interpretation and application of local, state and federal regulations. The development of a district program requires the input and involvement of district administrators and staff, and the Coordinator of Health Safety and Energy. Individual district programs reflect the specific conditions and needs of that District and is reviewed, evaluated and updated as needed.
