

August 13, 2025

Mr. Scott Rutkowski  
Erie 2-Chautauqua-Cattaraugus BOCES  
8685 Erie Road  
Angola, New York 14006

**Re: Lead Testing in School Drinking Water**

Dear Mr. Rutkowski:

Included with this letter is Stohl Environmental LLC's report for the Lead in Drinking Water Sampling performed for Erie 2-Chautauqua-Cattaraugus BOCES including:

- **Ormsby Educational Center – 1010 Center Street, East Aurora, NY**

This report is prepared to assist school districts in complying with the requirements of 10 NYCRR Subpart 67-4: *Lead Testing in School Drinking Water*, by identifying the sources of potable water with lead concentrations greater than the NYS "Action Level of 5 parts per billion (ppb)".

Sampling was performed on June 25, 2025. As detailed in Section 1.2 (*Executive Summary*) of the accompanying report, based upon the sampling and analysis performed, 21 sources of potable water at the Ormsby Educational Center have been identified as having lead concentrations in water above the NYS Action Level of 5 parts per billion. To comply with NYS regulations, response actions by the district are required. Response actions are outlined in Section 1.3 (*Response Actions Required Under NYS Regulations*).

Thank you for the opportunity to be of service to Erie 2-Chautauqua-Cattaraugus BOCES.

Sincerely,  
Stohl Environmental, LLC.

Michael Scinta  
EPA Lead Risk Assessor

**Lead Testing in School Drinking Water**

**Prepared for:**

**Erie 2-Chautauqua-Cattaraugus BOCES**

**Conditions as of June 25, 2025**

## Summary Tabulation

### Lead in Drinking Water Investigation

- 1.1. Scope of Work and Sampling Protocol
- 1.2. Executive Summary of Sampling and Analysis
- 1.3. Response Actions Required Under NYS Regulations
- 1.4. Laboratory Analytical Reports and Chain of Custody Documents
- 1.5. Laboratory Certifications

## 1.1 Scope of Work and Sampling Protocol:

Stohl Environmental was retained by Erie 2-Chautauqua-Cattaraugus BOCES to perform sampling and analysis of potable water for lead concentrations. Sampling was performed in the following building:

- **Ormsby Educational Center – 1010 Center Street, East Aurora, NY**

### Scope of Work:

Stohl Environmental was charged with collecting first-draw water samples from outlets within the Ormsby Education Center. Outlets are defined in NYS regulations as: “a potable water fixture currently or potentially used for drinking or cooking purposes, including but not limited to a bubbler, drinking fountain, or faucets”.

### Sampling Protocol:

In accordance with NYS regulations, ***Subpart 67-4: Lead Testing in School Drinking Water***, and the EPA guidance document, ***3Ts for Reducing Lead in Drinking Water in Schools***, Stohl Environmental’s protocol can be summarized as follows:

- **First-draw samples** of 250 milliliters (mL) were collected from cold water outlets before any water was used. Sampling was coordinated with District representatives to assure that water was motionless in the pipes for a minimum of 8 hours, but not more than 18 hours before sample collection.
- **Laboratory Analysis:** Samples were submitted following strict chain-of-custody protocols to an independent laboratory approved by the NYS Department of Health’s Environmental Laboratory Approval Program (ELAP).

## 1.2 Executive Summary of Sampling and Analysis:

### Summary of Samples Collected at the Ormsby Educational Center:

| Building Name             | Date of Sampling | Total Samples | At or Below Action Level* | Above Action Level* |
|---------------------------|------------------|---------------|---------------------------|---------------------|
| Ormsby Educational Center | June 25, 2025    | 38            | 13                        | 21                  |

\*NYS Action Level is 5 parts per billion

### Listing of Outlets Requiring Remediation

The following outlets were analyzed above the NYS Action Level:

| Sample # | Location                              | Fixture/Outlet type | Laboratory Analysis (in ppb) |
|----------|---------------------------------------|---------------------|------------------------------|
| 199.6-01 | Copy Room Sink                        | Sink                | 10.0                         |
| 199.6-02 | Office Bathroom                       | Sink                | 53.2                         |
| 199.6-03 | Faculty Right Bathroom Men's          | Sink                | 537                          |
| 199.6-04 | Faculty Left Bathroom Women's         | Sink                | 111                          |
| 199.6-05 | DF Across from Room 200               | Drinking Fountain   | 22.3                         |
| 199.6-06 | Room 202 Sink                         | Sink                | 6.9                          |
| 199.6-08 | 209 Sink                              | Sink                | 9.6                          |
| 199.6-09 | 211 Main sink                         | Sink                | 8.8                          |
| 199.6-10 | 211 Br Sink                           | Sink                | 12.2                         |
| 199.6-11 | DF Across 211B                        | Drinking Fountain   | 15.4                         |
| 199.6-13 | 210 Sink by windows and stock room    | Sink                | 9.1                          |
| 199.6-14 | 210 Solo sink by dish sinks           | Sink                | 5.0                          |

| 199.6-22 | Boys bathroom across 207 right        | Sink                | 7.4                          |
| 199.6-24 | DF Diag room 103- right of Women's br | Drinking Fountain   | 9.9                          |
| 199.6-27 | Room 103 sport conditioning           | Sink                | 8.2                          |
| 199.6-31 | Room 100 by animals                   | Sink                | 5.2                          |
| 199.6-32 | Room 100 plastic sink                 | Sink                | 18.9                         |
| 199.6-33 | Room 111 Br sink                      | Sink                | 13.8                         |
| 199.6-34 | Room 111 sink                         | Sink                | 14.9                         |
| 199.6-35 | Room 200 C sink                       | Sink                | 6.6                          |

**1.3 Response Actions Required Under NYS Regulations, Section 67-4.4:**

For outlets analyzed with a lead concentration more than the NYS Action Level, regulations require:

- (a) Prohibit use of the outlet until:
  - (1) a lead remediation plan is implemented to mitigate the lead level of such outlet; and
  - (2) test results indicate that the lead levels are at or below the action level;
- (b) Provide building occupants with an adequate supply of potable water for drinking and cooking until remediation is performed;
- (c) Report the test results to the local health department as soon as practicable, but no more than 1 business day after the school received the laboratory report; and
- (d) Notify all staff and all persons in parental relation to students of the test results, in writing, as soon as practicable but no more than 10 business days after the school received the laboratory report.

**Laboratory Results for: E2CC BOCES Ormsby**

Dear Michael,

Enclosed are the results of the sample(s) submitted to our laboratory July 02, 2025  
For your reference, these analyses have been assigned our service request number **R2508361**.

All testing was performed according to our laboratory's quality assurance program and met the requirements of the TNI standards except as noted in the case narrative report. Any testing not included in the lab's accreditation is identified on a Non-Certified Analytes report. All results are intended to be considered in their entirety. ALS Environmental is not responsible for use of less than the complete report. Results apply only to the individual samples submitted to the lab for analysis, as listed in the report. The measurement uncertainty of the results included in this report is within that expected when using the prescribed method(s), and represented by Laboratory Control Sample control limits. Any events, such as QC failures or Holding Time exceedances, which may add to the uncertainty are explained in the report narrative or are flagged with qualifiers. The flags are explained in the Report Qualifiers and Definitions page of this report.

**Client:** Stohl Environmental  
**Project:** E2CC BOCES Ormsby  
**Sample Matrix:** Drinking Water

**Service Request:** R2508361  
**Date Received:** 07/02/2025

#### CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

#### Sample Receipt:

Thirty eight drinking water samples were received for analysis at ALS Environmental on 07/02/2025. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

#### Metals:

No significant anomalies were noted with this analysis.

9. Were all bottle labels complete (i.e. analysis, preservation, etc.)?

YES NO

10. Did all bottle labels and tags agree with custody papers?

YES NO

11. Were correct containers used for the tests indicated?

YES NO

12. Were 5035 vials acceptable (no extra labels, not leaking)?

YES NO

13. Were dissolved metals filtered in the field?

YES NO

14. Air Samples: Cassettes / Tubes Intact Y / N with MS Y / N

Canisters Pressurized

Tedlar® Bags Inflated

NA

## REPORT QUALIFIERS AND DEFINITIONS

|   |                                                                                                                                                                                                                                                                                                        |     |                                                                                                                                                                                                                      |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| U | Analyte was analyzed for but not detected. The sample quantitation limit has been corrected for dilution and for percent moisture, unless otherwise noted in the case narrative.                                                                                                                       | +   | Correlation coefficient for MSA is <0.995.                                                                                                                                                                           |
| J | Estimated value due to either being a Tentatively Identified Compound (TIC) or that the concentration is between the MRL and the MDL. Concentrations are not verified within the linear range of the calibration. For DoD: concentration >40% difference between two GC columns (pesticides/Aroclors). | N   | Inorganics- Matrix spike recovery was outside laboratory limits.                                                                                                                                                     |
| B | Analyte was also detected in the associated method blank at a concentration that may have contributed to the sample result.                                                                                                                                                                            | N   | Organics- Presumptive evidence of a compound (reported as a TIC) based on the MS library search.                                                                                                                     |
| E | Inorganics- Concentration is estimated due to the serial dilution was outside control limits.                                                                                                                                                                                                          | S   | Concentration has been determined using Method of Standard Additions (MSA).                                                                                                                                          |
| E | Organics- Concentration has exceeded the calibration range for that specific analysis.                                                                                                                                                                                                                 | W   | Post-Digestion Spike recovery is outside control limits and the sample absorbance is <50% of the spike absorbance.                                                                                                   |
| D | Concentration is a result of a dilution, typically a secondary analysis of the sample due to exceeding the calibration range or that a surrogate has been diluted out of the sample and cannot be assessed.                                                                                            | P   | Concentration >40% difference between the two GC columns.                                                                                                                                                            |
| * | Indicates that a quality control parameter has exceeded laboratory limits. Under the "Notes" column of the Form I, this qualifier denotes analysis was performed out of Holding Time.                                                                                                                  | C   | Confirmed by GC/MS                                                                                                                                                                                                   |
| H | Analysis was performed out of hold time for tests that have an "immediate" hold time criteria.                                                                                                                                                                                                         | Q   | DoD reports: indicates a pesticide/Aroclor is not confirmed ( $\geq 100\%$ Difference between two GC columns).                                                                                                       |
| # | Spike was diluted out.                                                                                                                                                                                                                                                                                 | X   | See Case Narrative for discussion.                                                                                                                                                                                   |
|   |                                                                                                                                                                                                                                                                                                        | MRL | Method Reporting Limit. Also known as:                                                                                                                                                                               |
|   |                                                                                                                                                                                                                                                                                                        | LOQ | Limit of Quantitation (LOQ)<br>The lowest concentration at which the method analyte may be reliably quantified under the method conditions.                                                                          |
|   |                                                                                                                                                                                                                                                                                                        | MDL | Method Detection Limit. A statistical value derived from a study designed to provide the lowest concentration that will be detected 99% of the time. Values between the MDL and MRL are estimated (see J qualifier). |
|   |                                                                                                                                                                                                                                                                                                        | LOD | Limit of Detection. A value at or above the MDL which has been verified to be detectable.                                                                                                                            |
|   |                                                                                                                                                                                                                                                                                                        | ND  | Non-Detect. Analyte was not detected at the concentration listed. Same as U qualifier.                                                                                                                               |

### Rochester Lab ID # for State Accreditations<sup>1</sup>

| NELAP States            |
|-------------------------|
| Florida ID # E87674     |
| New Hampshire ID # 2941 |
| New York ID # 10145     |

| Delaware Approved      |
| Maine ID #NY01587      |
| North Carolina #36701  |
| North Carolina #676    |
| Rhode Island LAO00333  |

<sup>1</sup> Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state or agency requirements. The test results meet requirements of the current NELAP/TNI standards or state or agency requirements, where applicable, except as noted in the case narrative. Since not all analyte/method/matrix combinations are offered for state/NELAC accreditation, this report may contain results which are not accredited. For a specific list of accredited analytes, contact the laboratory. To verify NH accredited analytes, go to <https://www4.des.state.nh.us/CertifiedLabs/Certified-Method.aspx>.

## PREPARATION METHODS

The preparation methods associated with this report are found in these tables unless discussed in the case narrative.

### INORGANIC

#### Water/Liquid Matrix

| Analytical Method                                     | Preparation Method                      |
|-------------------------------------------------------|-----------------------------------------|
| 200.7                                                 | 200.2                                   |
| 200.8                                                 | 200.2                                   |
| 6010C or 6010D                                        | 3005A/3010A                             |
| 6020A or 6020B                                        | ILM05.3                                 |
| 9034 Sulfide Acid Soluble                             | 9030B                                   |
| SM 4500-CN-N-2016<br>Amenable and Residual<br>Cyanide | SM 4500-CN-G and<br>SM 4500-CN-B,C-2016 |
| SM 4500-CN-E WAD<br>Cyanide                           | SM 4500-CN-I                            |

#### Solid/Soil/Non-Aqueous Matrix

| Analytical Method                                                                                            | Preparation Method |
|--------------------------------------------------------------------------------------------------------------|--------------------|
| 6010C or 6010D                                                                                               | 3050B              |
| 6020A or 6020B                                                                                               | 3050B              |
| 6010C or 6010D TCLP<br>(1311) extract                                                                        | 3005A/3010A        |
| 6010C or 6010D SPLP<br>(1312) extract                                                                        | 3005A/3010A        |
| 7199                                                                                                         | 3060A              |
| 300.0 Anions/ 350.1/ 353.2/<br>SM 2320B/ SM 5210B/<br>9056A Anions                                           | DI extraction      |

### ORGANIC

**Preparation Methods for Organic methods are listed in the header of the Results pages.**

#### Regarding "Bulk/5035A":

For soil/solid samples submitted in soil jars for Volatiles analysis, the prep method is listed as "Bulk/5035A". The lab follows the closed-system EPA 5035A protocols once the sample is transferred to a sealed vial, but collection in bulk in soil jars does not follow the collection protocols listed in EPA 5035A. In accordance with the NYSDOH technical notice of October 2012, all results or reporting limits <200 ug/kg are to be considered estimated due to potential low bias.

**Date Analyzed:** 07/21/25

**Duplicate Matrix Spike Summary**  
**Inorganic Parameters**

**Sample Name:** 199.6-02  
**Lab Code:** R2508361-002  
**Analysis Method:** 200.8

**Units:** ug/L  
**Basis:** NA

| Analyte Name | Matrix Spike  |        |              |       | Duplicate Matrix Spike |              |       |              | RPD | RPD Limit |
|--------------|---------------|--------|--------------|-------|------------------------|--------------|-------|--------------|-----|-----------|
|              | Sample Result | Result | Spike Amount | % Rec | Result                 | Spike Amount | % Rec | % Rec Limits |     |           |
| Lead, Total  | 53.2          | 72.7   | 20.0         | 98    | 72.3                   | 20.0         | 95    | 70-130       | <1  | 20        |

Results flagged with an asterisk (\*) indicate values outside control criteria.

Results flagged with a pound (#) indicate the control criteria is not applicable.

Percent recoveries and relative percent differences (RPD) are determined by the software using values in the calculation which have not been rounded.

Matrix Spike and Matrix Spike Duplicate Data is presented for information purposes only. The matrix may or may not be relevant to samples reported in this report. The laboratory evaluates system performance based on the LCS and LCSD control limits.

## 1.5 Laboratory Certifications

**NEW YORK STATE DEPARTMENT OF HEALTH  
WADSWORTH CENTER**

Expires 12:01 AM April 01, 2026  
Issued April 01, 2025

**CERTIFICATE OF APPROVAL FOR LABORATORY SERVICE**  
*Issued in accordance with and pursuant to section 502 Public Health Law of New York State*

**MS. CHRISTINE KUTZER**  
**ALS ENVIRONMENTAL - ROCHESTER**  
**1565 JEFFERSON ROAD BUILDING 300, SUITE 360**  
**ROCHESTER, NY 14623**

NY Lab Id No: 10145

*is hereby APPROVED as an Environmental Laboratory in conformance with the  
National Environmental Laboratory Accreditation Conference Standards (2016) for the category  
ENVIRONMENTAL ANALYSES POTABLE WATER  
All approved analytes are listed below:*

|                                         |                                     |
|-----------------------------------------|-------------------------------------|
| <b>Bacteriology</b>                     |                                     |
| Coliform, Total / E. coli (Qualitative) | SM 20, 21-23 9223B (-04) (Colilert) |
| <b>Dissolved Gases</b>                  |                                     |
| Acetylene                               | RSK-175                             |
| Ethane                                  | RSK-175                             |
| Ethene (Ethylene)                       | RSK-175                             |
| Methane                                 | RSK-175                             |
| Propane                                 | RSK-175                             |
| <b>Fuel Additives</b>                   |                                     |
| Methyl tert-butyl ether                 | EPA 524.2                           |
| Naphthalene                             | EPA 524.2                           |
